MUFG Japan Equity Small & Mid Cap Fund

EURO B (LU1910147237)

a sub-fund of MUFG Global Fund SICAV

The Fund is managed by Waystone Management Company (Lux) S.A.

Objectives and Investment Policy

Investment Objective

The Sub-Fund has an active investment strategy and is not managed in reference to a benchmark, uses a reference rate for performance comparison purpose only. The Sub-Fund mainly invests in marketable equity securities listed in Japan, including exchange traded funds and stock index futures. The Sub-Fund will primarily invest in small and mid cap securities.

Investment Policy

The Sub-Fund applies the investment strategy developed by the Investment Manager based on a stock bottom-up selection approach with a mid-long term view, typically over a three to five year horizon and beyond.

The Sub-Investment Manager focuses on idiosyncratic Japanese stocks with pioneering business models and long-term growth potential through economic cycles. Companies with sustainable growth potential are often smaller companies in a new industry or with a dominant technology in a niche area. The Sub-Investment manager tries to identify attractive Japanese small-cap companies, which are overlooked by other market participants, based on rigorous bottom-up research.

The reference rate of the Sub-Fund is MSCI Japan Small Cap (Gross) denominated in JPY. The reference rate is indicated for information

purposes only and the Sub-Investment Manager does not intend to track it. The Sub-Fund can significantly deviate from it.

The Sub-Fund may enter into financial derivatives contracts for efficient portfolio management and hedging purposes only. The Sub-Fund may also invest into recently issued transferable securities and into not listed transferable securities.

The reference currency of the Sub-Fund is JPY and the currency of this share class is EUR.

Risk and Reward Profile

The risk and reward indicator illustrates where the Sub-Fund is positioned in terms of its possible risk and reward. The higher the Sub-Fund's position on this scale, the greater the possible reward, but also the greater risk of losing money. This risk indicator is calculated using historical data, which cannot be used as a prediction for the future. Therefore the risk classification may change over time. Even if the Sub-Fund is in the lowest risk class you can lose money, as no investments are entirely risk free.
